

**2017 HURRICANE SEASON  
PRIORITY STATUS PROGRAM FOR DIESEL FUEL**

Company: \_\_\_\_\_

Address: \_\_\_\_\_

Contact Name: \_\_\_\_\_ Fax Number: \_\_\_\_\_

Office Number: \_\_\_\_\_ Cell Number: \_\_\_\_\_

Email Address: \_\_\_\_\_

**Guidelines:**

Annual Retainer fee: \$300.00 per year

We are pleased to supply diesel fuel to your generator tanks located at the above address. During emergency periods resulting from hurricanes, this location will be given general preference in the scheduling of our off road diesel deliveries. We will resume operations as soon as it is safely possible after a storm. We are confident in our ability to deliver fuel to your generator tanks within 2-3 days of a storm, and every 2-3 days thereafter until no longer necessary.

By law, following any emergency situation we must 1<sup>st</sup> serve hospitals, medical facilities, police, fire and emergency facilities and other critical needs. Being on the Hurricane Program will put you in the group to be served immediately following this group. Service will be conducted on a best effort basis and with the understanding that the emergency situation could create conditions beyond our control which prevent or delay delivery service.

We require that you top off this tank prior to Hurricane Season and that your account remains within credit terms. It is recommended that you have your fuel tested annually and review your tank size and the length of time it will support your generators. In a prolonged emergency power outage, it may be difficult to deliver to a location more than twice a week. Please give me a call with any additional questions.
